THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The 1951 program for nickel wire mesh totals 90,000 square meters, of which the Metallweberei at Neustadt/Orla (VVB Tewa) is to make 60,000 and the Baderschneider & Lenzner firm at Zeulenrods, 30,000. This will occupy the Neustadt firm until about 10 May 1951. It is expected that an additional order for 35,000 sq. m. will be placed, which would occupy the Neustadt firm until the end of August or the beginning of September, allowing for the workers' vacations.
2. The Neustadt plant and its subsidiaries have 90 machines in operation. It is planned to reduce this number to 80-82.
3. Deliveries of wire from the Kupfer-und Messingwerk Hettstedt have started again after an interruption, and there should be no difficulties with regard to raw materials.
4. The price question has been settled with regard to the Hettstedt firm, but not with regard to the Kabelwerk Köpenick, formerly C.J. Vogel, Berlin - Köpenick.
5. The acceptance conditions have been made much stricter by the Soviet Control Commission, and a decision concerning the use of rejected material must be made by VVB Tewa.
